usn _____

ssart _____

tpnales planets

onom _____

2 The sky. Read and circle.

The (1) sun / moon is a star. It is very big and bright. This means we can't see other (2) moons / stars in the sky in the day. Earth is a (3) planet / star. It moves around the (4) sun / moon. When our part of Earth faces away from the sun, it is night for us. We can see many (5) moons / stars in the night sky. The (6) sun / moon is big and bright in the night sky.

3 Match the descriptions and the words from 1. Write.

1 They move around the sun. Earth is one of them. planets

2 There are lots of these in the night sky. _____

3 It is bright in the sky in the day. _____

4 It looks big in the night sky. _____
