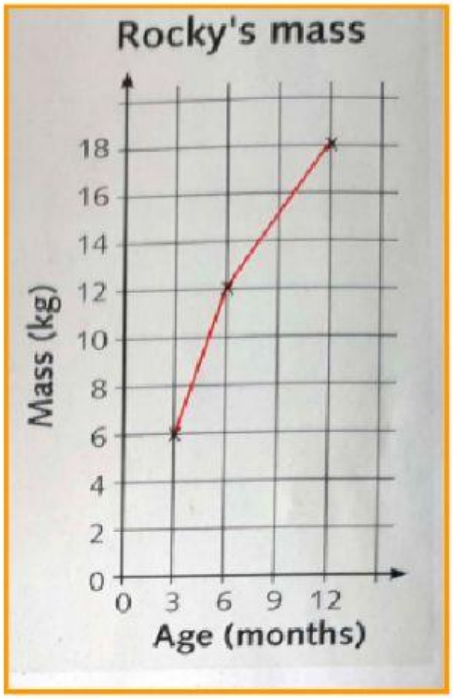
LG: Use information presented in a line graph to solve problems.

Challenge 1



1. The graph shows Rocky the puppy's mass from 3 months to 12 months. What was Rocky's mass in kilograms:

   a) at 3 months?

   b) at 12 months?

2. How much heavier was Rocky at 6 months than 3 months?

3. What was the approximate mass of Rocky at 9 months?
