GEOGRAPHY QUIZ - 2ND TERM

Choose the correct alternative.

1) The _____ is the part of the Earth where life exists.

a) Lithosphere

b) Geosphere

c) Atmosphere

d) Biosphere

2) The _____ represents the solid part of our planet composed by rocks and soil.

a) Lithosphere

b) Hydrosphere

c) Atmosphere

d) Biosphere

3) The _____ is composed by all the sources of water, like rivers, oceans, seas and even the rain and icecaps.

a) Lithosphere

b) Hydrosphere

c) Atmosphere

d) Biosphere

LIVEWORKSHEETS

4) The _____ is composed by the gases that surrounds our planet like oxygen, nitrogen, ozone, carbon dioxide, etc.

a) Lithosphere

b) Geosphere

c) Atmosphere

d) Biosphere

5) "Bio" means _____.

a) Water

b) Ground

c) Air

d) Life

6) "Hydro" means _____.

a) Water

b) Ground

c) Air

d) Life

LIVEWORKSHEETS

7) "Atmo" means _____.

a) Water

b) Ground

c) Air

d) Life

8) "Geo" means _____.

a) Water

b) Ground

c) Air

d) Life

9) A biome is _____.

a) A small area characterized by a specific type of climate and without any types of plants and animal.

b) A large area characterized by a specific type of climate and certain types of rocks

c) A large area characterized by a specific type of climate and certain types of plants and animal communities

d) A large area with certain types of plants and animal communities.

LIVEWORKSHEETS

10) There are two types of biomes: _____.

a) land and aquatic biomes

b) animal and plant biomes

c) solar and underground biomes

d) gaseous and solid biomes

11) There are _____ major land biomes.

a) four

b) six

c) five

d) seven

12) It is a land of extreme cold, high winds and very little rain.

a) The grasslands

b) The tundra

c) The tropical rainforest

d) The deserts

LIVEWORKSHEETS

13) _____ have many names such as steppes, savannas, pampas and prairies.

a) The grasslands

b) The deciduous forests

c) The tropical rainforest

d) The deserts

14) These areas are very dry and often very hot.

a) The coniferous forests

b) The deciduous forests

c) The tundra

d) The deserts

15) This biome supports the greatest variety of lifeforms on Earth.

a) The coniferous forests

b) The deciduous forests

c) The tundra

d) The tropical rainforests

LIVEWORKSHEETS

16) In this biome during the fall, trees change color and then lose their leaves.

a) The coniferous forests

b) The deciduous forests

c) The tropical rainforests

d) The grasslands

17) The dominant plant of this biome are evergreen conifers such as pines and hemlocks.

a) The coniferous forests

b) The deciduous forests

c) The tropical rainforests

d) The deserts

18) What biome is this?

LIVEWORKSHEETS

a) The coniferous forest

b) The grassland

c) The tundra

d) The desert

19) What biome is this?

a) The coniferous forest

b) The tropical forest

c) The desert

d) The tundra

LIVEWORKSHEETS

20) What biome is this?

a) The coniferous forest

b) The deciduous forest

c) The tropical rainforest

d) The grassland
