ULANGKAJI BAB 1

$$\frac{(6cd^3)^2 \times c^4 d}{(3c^2 d)^4}$$

$$= \frac{\square^2 c^2 d^{3(\square)} \times c^4 d}{\square^4 c^{2(\square)} d^4}$$

$$= \frac{\square c^2 d^6 \times c^4 d}{\square c^8 d^4}$$

$$= \frac{\square}{\square} c^{2+4-\square} d^{6+1-\square} = \frac{\square}{\square} c^{\square} d^{\square}$$
