Qualitative vs Quantitative Observations

Liveworksheet Link:

Directions: Answer the following questions about the types of observations. You may use the notes or presentation from Canvas to help you. Once finished, please click finish at the bottom of the screen and check my answers. Upload a screenshot of your score to the assignment "Types of observations" in Canvas.

1. The gummy worm is 12 cm long.
2. The dogs are small.
3. There are red birds sitting in the tree.
4. The piece of limestone is 30 grams.
5. The corn is taller than the tomato plants.
