# Faster and Slower

You can make an object go faster or slower by changing 2 things:

1. The size of the force 2. The amount of friction

| | | |
|---|---|---|
| | | |
| How can Lucy make the ball move **quicker**? | How can Tim go **quicker** down the slide? | How can Dan make the bike go **slower**? |
| | | |
| | | |
| How can Josh make the box move **quicker**? | How can Sally make the ball move **slower**? | How can Jess make the ball mover **quicker**? |
