DLP SCIENCE YEAR 2

THE NATURAL WATER CYCLE

F **Label correctly the natural water cycle below.** LS 9.1.4 PL 4

Rain | Water | Water vapour | Cloud

G **Write numbers in the boxes to show the correct sequence of the natural water cycle.** LS 9.1.4 PL 4

1. Water from the seas or lakes evaporates to become water vapour and rises to the sky.

2. Rain water flows back into the rivers and seas.

3. Clouds become heavy and fall as rain.

4. Water vapour is cooled and becomes water droplets that form clouds.
