## THE NATURE OF GOD

**Read and study the notes.**

The Bible tells us that God is a Spirit; a living being that does not possess a physical body. The word spirit is commonly associated with the words "breath" and "wind." Like the wind, God can be heard but not seen. He is not confined to space or time and His origin is not known.

In the book of John Chapter 4 verse 24, Jesus in a conversation with the Woman of Samaria, stated that God is a Spirit. In the book of Luke Chapter 24 verse 39 Jesus said that "a spirit has not flesh and bones." II Corinthians 3:17 also states that God is a Spirit. The Bible confirms that God is invisible (I Timothy 1:17) and cannot physically be seen by humans (I John 4:12).

God is a Spirit, so human beings can only communicate with Him through the power of the Holy Spirit. God's Spirit lives in us and helps us to communicate with Him (Romans 8:26). Human beings communicate with God through prayers, songs, worship and even through silence. (John 4:24 & Jude 20). Communicating with God means speaking and listening to Him.

Yes No

I have read the notes and will study them again later. _____
