**Biology (General)**
**Grade 10**

# Activity Worksheet: Energy in Chemical Reactions

Watch the video and compare what happens to energy in **exothermic and endothermic** reactions by completing the diagram below:

**Exothermic Reaction**

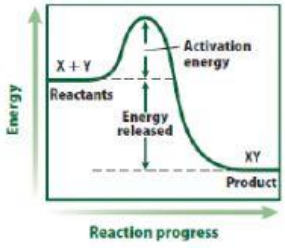
During the reaction, energy is

_____

**As a result, the energy of product is**

**_____ than the energy of**

**reactants.**



_____

_____

**Endothermic Reaction**

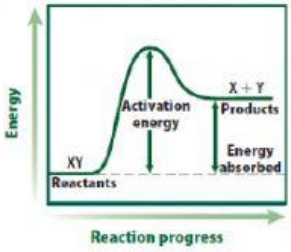
During the reaction, energy is

_____

**As a result, the energy of product is**

**_____ than the energy of**

**reactants.**



_____

_____
