Harvest Numbers

Name _____ Class _____

1. Michael picked 5 bushels of green beans and 6 bushels of corn. If he gave 2 bushels of green beans to our neighbor and 1 bushel of corn to our other neighbor; how many bushels of each would we have left?

2. There are 12 pumpkins in our garden, and we purchased 12 more pumpkins from the farmer down the road. How many pumpkins do we have in total?

3. I need 14 pounds of pumpkin to make 12 pies. Each pumpkin weighs 2 pounds. How many pumpkins do I need to make the pies?

4. There are 14 bales of hay to feed the animals. We use 2 bales of hay each day. How many days will our 14 bales of hay last?

5. There are 18 squash of many different sizes in my garden. I cannot eat all of these! How may people can I give 3 squash each to?

6. I have picked 25 bushels of apples! I am going to can all these apples so that I can make pies and cook them throughout the winter. I need to have 12 jars for each bushel of apples. How many jars will I need?

7. There are too many peaches from the summer! I am going to freeze these peaches and store them away. I can freeze 6 peaches in one bag. If I have 218 peaches to freeze, how many bags do I need?

8. I am making walnut chocolate chip cookies. I must use these walnuts that are all over my yard! I need 2 pounds of walnuts for each batch of cookies. I have 8 pounds of walnuts. How many batches of cookies can I make?
