Unit 8:energy

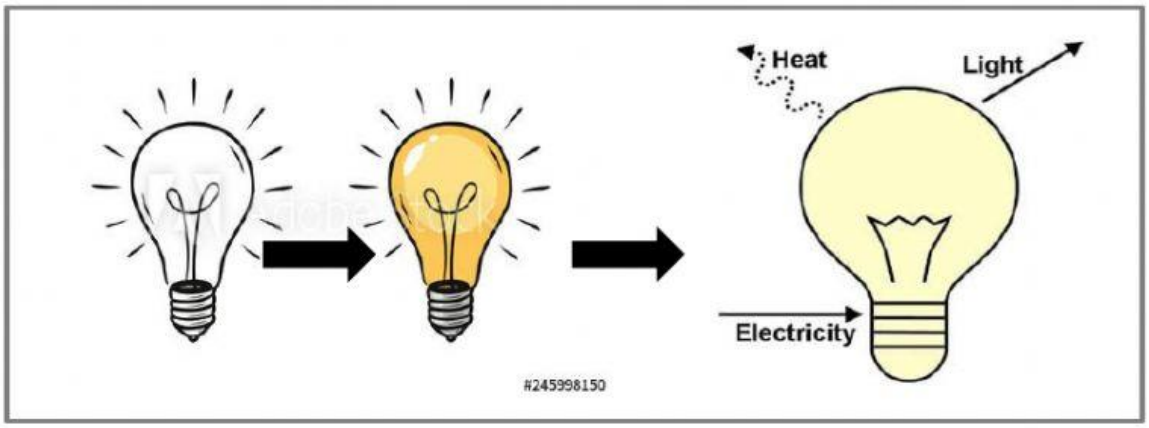
READ AND WATCH THE VIDEO

Energy is all around us. It makes things move and it also makes machines work.

There are lots of types of energy. Such as:

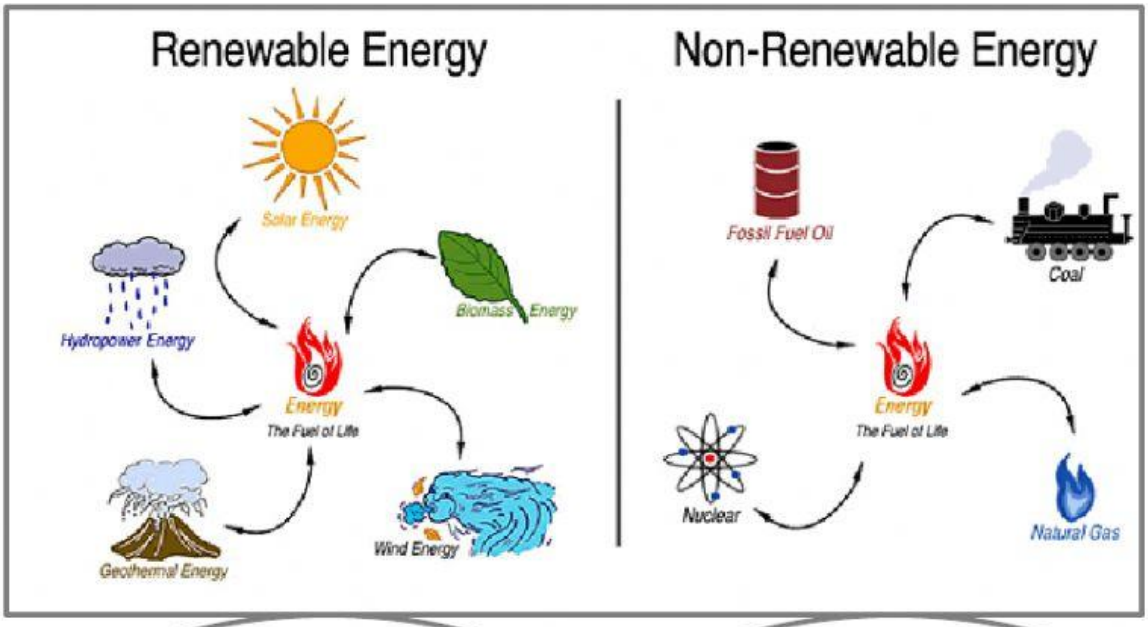
THERMAL ENERGY	LIGHT ENERGY
SOUND ENERGY	ELECTRICAL ENERGY

We cannot create or destroy energy, but we can change it from one type to another. For example: when we switch on a light, electrical energy is transformed into light and thermal energy.



LIVEWORKSHEETS

There are two types of energy sources:



All unlimited sources present in nature.

All limited sources present in nature.
