Rounding to the Nearest Million

Find the millions place, then look at the number to the right. If the number to the right is 4 or smaller we do not change the number we are going to round to.

Now look at the digit you are rounding and determine if you're going to increase it and then turn the rest of the digits to the right to zeros.

1. 42, 413, 699

2. 68, 617, 921

3. 6, 375, 322

4. 17, 955, 971

5. 19, 100, 571
