Look at the graph and then read the model answer. Choose the right word to go in the gap.

The _____below shows changes in the amount and type of _____consumed by Australian teenagers from 1975 to 2000.

In 1975,the most popular fast food with Australian teenagers was_____, being eaten 100 times a year. This is far higher than pizza and hamburger, which were consumed approximately 5 times a year. However, apart from a brief rise again from 1982 to 1985, the consumption of fish and chips gradually_____over the 25 years' timescale to finish at just under 40 times per year.

In sharp contrast to this, teenagers ate the other two fast foods as much higher level. Pizza consumption_____gradually until it took over the consumption of fish and chips in 1990. It then remained stable from 1995 to 2000. The biggest rise was seen in hamburger, increasing sharply throughout the 1970s and 1980s, exceeding that of fish and chips consumption in 1985. It finished at the same level that fish and chips began with consumption at 100 times a year. Overall, the consumption of fish and chips _____ over the period. Whereas the amount of pizza and hamburgers that were eaten _____
