UNIT 7: LINES AND ANGLES

Lesson 1: Lines and segments

I. Basic knowledge

- A **line** extends forever in both directions, like this

- A **line segment** is just a part of a line. It has two endpoints, like this

- Line segment AB is 10cm long.

- A **ray** is just a part of a line. It has one endpoint and extends forever in one direction, like this

- We can **measure** the length of a line segment, but not of a line or a ray.

II. Vocabulary

English words	Meaning
Line	Đường thẳng
Extend	Mở rộng
Direction	Hướng
Line segment	Đoạn thẳng

English word	Meaning
Point	Điểm
End point	Đầu mút
Ray	Tia

III. Practice

1. Write the missing letter.

a. li__e

b. r__y

c. l__ne se__me__t

d. p__int

LIVEWORKSHEETS

2. Tick (✓) the correct option.

a. What is this?

- ☐ Point
- ☐ Line
- ☐ Line segment

b. What is this?

- ☐ Point
- ☐ Line
- ☐ Line segment

c. What is this?

- ☐ Point
- ☐ Line
- ☐ Ray

d. What is this?

- ☐ Point
- ☐ Line
- ☐ Line segment

e. What is this?

- ☐ Point
- ☐ Ray
- ☐ Line segment

f. What are these?

- ☐ Ray and point
- ☐ Line and point
- ☐ Line segment and point
