DIGESTIVE SYSTEM.

Match →

MOUTH	The liver produces one of these liquids called bile.
ESOPHAGUS	In the small intestine nutrients are absorbed by our body.
STOMACH	The food our body doesn't need goes to the large intestine and it leaves the body as a waste.
LIVER	In our mouth we chew food and mix it with saliva to make it easier to swallow and digest.
SMALL INTESTINE	In the stomach, some liquids break down food into nutrients.
LARGE INTESTINE	Then food goes down the esophagus into out stomach.
