Understand math

2+2=4

Now you get that
Now solve this

1339+5370=

Understand that math gets harder the up you go.
Now math's language is numbers like 1 2 3 4 5.

Solve these and get 10/10: -

12+53 35+35

Understand that if you have 2 and you + it with 2 you will get 4 the same number you add you will get double the amount.

For example: -

3+3 will = to 6 because if Ashely had 6 chocolates and she gave 3 to Sofi how much would she have left the ANS is 3.

LIVEWORKSHEETS

Solve these: -

3+3 6+6

7+7 35+35

46+46 72+72

WELL DONE

Let's do more

Now multiply is just like pulse because it just goes more and more
For example: -

2x6=12 because it goes like this

2x1=2

2x2=4

2x3=6

LIVEWORKSHEETS

2x4=8

2x5=10

It never stops.
Do some more multiply**!**

2x4=	5x2=
1x3=	2x6=
9x5=	7x7=

THANKS FOR JOINING
