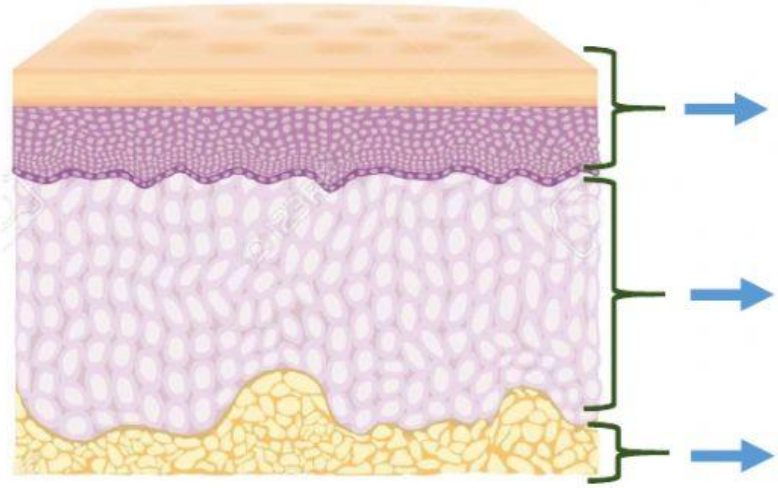
1.- Look at the picture, drag and drop the parts of the skin in the correct place

Dermis - Hypodermis - Epidermis



2.- Match the skin layers with their function

Dermis	**It is made up of skin cells. Every 4 weeks the cells die and are replaced them by new cells**
Hypodermis	**It contains hair follicles, sweat glands and nerve endings**
Epidermis	**It stores fat. The fat protects our bones and organs**
