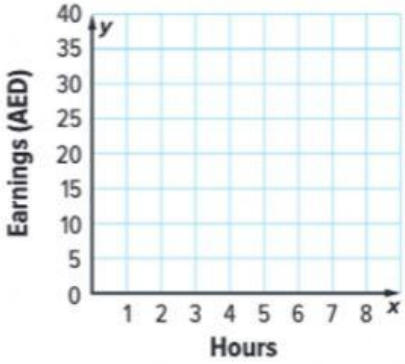
Power Up! Test Practice

14. Ibrahim earns AED 7 an hour for washing cars as a summer job. Complete the table of ordered pairs to show his total earnings for several hours. Then express the relation as a graph.

Hours Worked	Total Earned
1	
2	
3	
4	
5	



How much would Ibrahim earn for 12 hours of washing cars?

15. Determine if each statement about the relation {(3, 7), (5, 1), (6, 4), (2, 5)} is true or false.

a. The domain of the relation is {2, 3, 5, 6}. ☐ True ☐ False

b. The range of the relation is {1, 4, 5, 7}. ☐ True ☐ False

c. The value 5 is a member of both the domain and range. ☐ True ☐ False
