English Year 4
Week 7 (16th February 2022)

Lesson Objectives:

- Answer simple comprehension about endangered animals

Step to Success:

- Read text (instructions)
- Identify keywords in questions
- Write answer in complete sentence

How to protect snakes:

When you go into the jungle, there are some simple rules to follow:

1. Never go into the jungle by yourself. It can be a dangerous place and it is easy to get lost or hurt.
2. Stay on the path. This will help you to find your way back, and will make sure you do not step on the small bushes and undergrowth where the snakes live.
3. Cut only the bamboo poles you need. Don't take more than you need, or cut other trees. The snakes need the trees and bushes to live in.
4. Leave only your footprints behind. Do not drop litter or light fires in the jungle. You will be damaging the homes of many snakes.
