Understand divide

2x5=10

Understand that from the last worksheet well now let's figure out divide

Now how multiply goes is pulse now divide has its own thing
For example: -

$$\begin{array}{r|l} & 3 \\ \hline 3 & 9 \end{array}$$

Now that's divide's thing.
You can always try the smaller version
5÷2=10

Now divide doesn't work like multiply it does the opposite
For example: -
The number that comes in the table

The number of the table

5÷2=

The ANS

Divide is used very often in maths
