Muscular System Review 1

1. Bones and _____ do not produce movement
2. The body has more than _____ muscles
3. Muscles move due to _____ contractions and relaxation
4. The function of muscles is for movement, stability, control, and _____.
5. Heat is realeased when muscles
6. valve-like structions that open and close
7. Muscles hold bones tightly together with helps with _____.
8. pumps blood from heart to blood vessels
9. Contractions produce moevement in organs
10. Muscles attached to bones by tendons
11. Smooth muscles are _____
12. Skeletal and cardiac muscles are _____.
13. Muscles that cause facial expressions
14. Myocytes are also known as
15. cell membranes of muscles are known as
16. Cytoplasm in muscle cells is reffered to as
17. The arrangements of filaments in myofibrils produce?

A. skeletal
B. cardiac muscles
C. joints
D. heat production
E. sphincters
F. contract
G. Stability
H. Voluntary
I. sarcoplasm
J. alternating
K. smooth muscles
L. sarcolemma
M. Skeletal muscles
N. striations
O. 600
P. involuntary
Q. muscle fibers
