PLICKERS 3 - MALE REPRODUCTIVE SYSTEM

MISSED

01) Where are sperm cells produced?

A in the urethra
B in the testicles
C in the penis
D in the scrotum

MISSED

02) Which tubes transport sperm to the seminal vesicles?

A the scrotum
B the testicles
C the vas deferens
D the urethra

MISSED

03) Which two glands produce a liquid that makes up semen?

A The penis and the foreskin
B The prostate and the seminal vesicles
C The bladder and the prostate
D The testicles and the penis

MISSED

04) When does the body begin producing sperm cells?

A During the adult period
B During the childhood
C Durging the puberty
D During the birth

MISSED

05) What's another term for sperm cells?

A Glands
B Penis
C Gametes
D All the options are right

MISSED

06) They are two glands that produce part of the semen

A vas defenders
B testicles
C seminal vesicles
D prostate and urethra

MISSED

07) It's a fold of skin that covers the end of the penis

A testicles
B foreskin
C urethra
D scrotum

MISSED

08) It's a bag of skin that contains the testicles

A foreskin
B urethra
C scrotum
D penis

MISSED

09) It's a tube that goes from the bladder, prostate and penis

A seminal vesicle
B vas defender
C penis
D urethra

MISSED

10) It's a tube which sperm cells travel through from the testicles to the seminal vesicles and prostate

A seminal vesicle
B vas defender
C penis
D urethra

LIVEWORKSHEETS

MISSED

11) First, sperms are produced in tiny tubes inside the _____[1]. Then, each _____[2] transport them to the _____[3]. Next, sperms pass to the _____[4]. Finally, they are expelled through the _____[5] at the end of the _____[6]

A 1)testicles 2)vas defender 3)seminal vesicles 4)prostate 5)urethra 6)penis

B 1)vas defender 2)testicle 3)prostate 4)seminal vesicles 5)urethra 6)penis

C 1)testicles 2)seminal vesicle 3)vas defender 4)prostate 5)urethra 6)penis

D 1)testicles 2)vas defender 3)prostate 4)seminal vesicles 5)urethra 6)penis
