Convert the Mixed Numbers

Name: _____

① $1\frac{5}{10} = \frac{\square}{10}$

Step 1: $\square \times \square = \square$

Step 2: $\square + \square = \square$

Step 3: Keep the denominator the same

② $3\frac{3}{4} = \frac{\square}{\square}$

Step 1: $\square \times \square = \square$

Step 2: $\square + \square = \square$

③ What's the denominator?

③ $2\frac{5}{8} = \frac{\square}{\square}$

Step 1: $\square \square \square = \square$

Step 2: $\square \square \square = \square$

Step 3: What is staying the same?

④ $3\frac{2}{5} = \frac{\square}{\square}$

Step 1: $\square \square \square = \square$

Step 2: $\square \square \square = \square$

⑤ $4\frac{3}{5} = \frac{\square}{\square}$
