Solve the following sets of Simultaneous Equations

**Number One**

$x + y = 12$ (Equation #1)
$x - y = 4$ (Equation #2)

$x =$

$y =$

**Number Two**

$x + y = 20$
$x - y = 10$

$x =$

$y =$

**Number Three**

$x + y = 18$
$x - y = 12$

$x =$

$y =$

**Number Four**

$3x + y = 31$
$x - y = 1$

$x =$

$y =$

**Number Five**

$2x - y = 20$
$x + y = 25$

$x =$

$y =$

**Number Six**

$5x - 2y = 1$
$x + 2y = 17$

$x =$

$y =$
