Do you know how to use tape measure safely?

Watch the video below:

How can you keep safe when using a tape measure? Tick all that are correct.

1. You can wear safety glasses to protect your eyes.
2. Do not drop the tape measure on the ground because it can break.
3. Use the lock to avoid the tape from retracting.
4. When you finish measuring, just let go and the tape will quickly retract.
5. When pushing the tape back in, do it slowly so you don't hurt your finger.
6. You can hold the edge of the tape with your finger because it is not sharp.
7. You can use the hook over the top of the bench to keep the tape secure.
