Finding Factors

I can find factors of numbers.

To find the **factors** of a number, you need to find all the pairs of numbers that multiply together to make a **product**.

2 × 5 = 10

2 and 5 are **factors**. 10 is the **product.**

Fill in the missing factors for these products:

20

27

12

15

11

Now list the factors of these numbers:

1. 16
2. 21
3. 23
