The Old Farmer's Almanac

How did people predict the weather in the past?
A long time ago, in the 1700s, a young scientist named Robert B. Thomas studied the sun, the moon and the stars in relation to the weather and the seasons. In 1792, he produced a small book called The Farmer's Almanac to predict the weather for each year. It told farmers when to grow different plants and it gave fishermen information about the sea.
It also included recipes, articles and jokes. Farmers kept the book in their outhouse (a bathroom that is outside) to read and use old pages for toilet paper! Today, people continue to buy and use The Farmer's Almanac to read the weather predictions for each season and get advice about gardening. In addition to the paper version, readers can find the book online at almanac.com.
