Reading Comprehension

Workplace Hazards

A hazard is a danger that can hurt someone. You can get cut from sharp things or get burned from hot things. Moving things can hit, cut, or pinch you. People can get hurt when they pick up heavy things. Loud noise can hurt your ears. Breathing or touching chemicals can also hurt you. You can be safe if you are careful.

Write **Yes** or **No**.

A hazard is a danger that can hurt someone.		
You can get burned from cold things		
Moving things can hit, cut, or pinch you.
