Then, translate into English

In the school (!)... you can try this fun experiment!
You will need the following equipment:

Una bolsa de cierre de cremallera

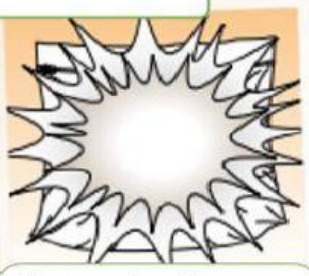
Primero, se pone 100 ml de agua tibia y 200 ml de vinagre dentro de la bolsa. La temperatura no debe ser más de 60º

Una jarrita con medida

Después, añade 3 cucharadas de bicarbonato a la bolsa del líquido

Agua tibia / vinagre y bicarbonato

Cierra rápido la bolsa con el cremallera. Observa cómo un gas llamado dióxido de carbono se produce dentro de la bolsa. ¿Ves las burbujas?



Ahora aquí está la parte divertida. La bolsa crecerá y crecerá hasta que explosione
