GEOGRAPHIC COORDINATES

SOCIAL SCIENCE

UNIT 1: WHERE ON EARTH IS SPAIN?

We use measurements of latitude and _____ together to locate any place on Earth. We call these the _____ _____ of a place. We always write the _____ first. For example:

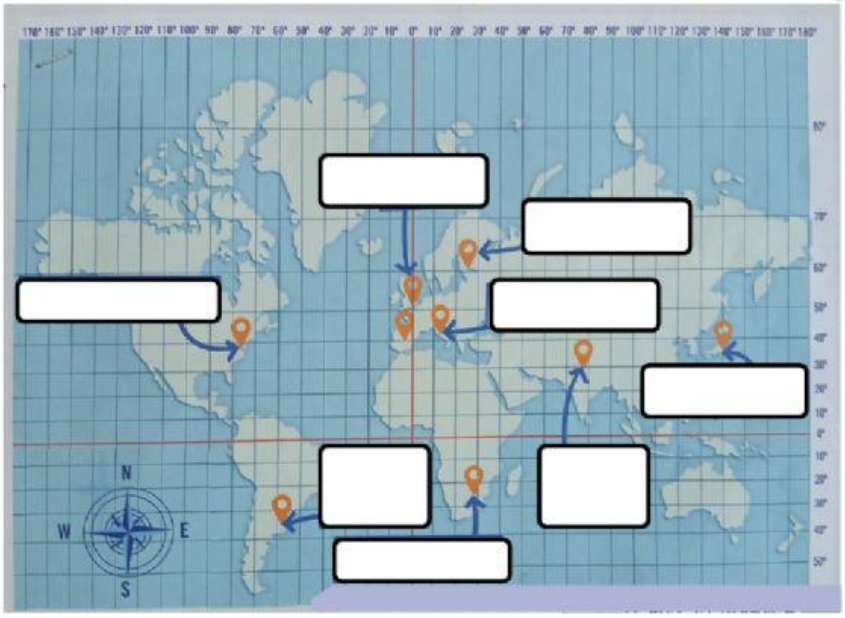
New York City is at a **latitude** of 41° to the north of the equator and a **longitude** of 74° to the west of the Prime Meridian. Its geographic coordinates are 41° N, 74° W.

London

Helsinki

Tokyo

Johannesburg



New Delhi

Washington D.C.

Rome

Buenos Aires
