Good morning Poliana. How have you been?	
	Oh, I have been fine and you?
	Okay, well, lets get started. Anything new or out of the ordinary you'd like **to report**?
	Fine
	No, nothing to report.
	Yes, although I may need **a refill a refill** of those drops
	Great. Have you been **keeping up with** the drops I gave you?
	I'll get the eye-drop prescription **filled out** after all consult.
Thanks Doctor! Could you also get the pharmacy to get me a ninety-day supply?	

Ninety days? Sure, I can do that. Okay, lets run through the eye test. Cover your left eye. Can you read the letters on the board starting at the top and moving down to the bottom?	
	The second row is: B, L, W, V
	Yes, the first letters are A, E, Z, Q
	Looking good! How about the last one?
	That's okay. Well it looks like you're having **some issues** focusing. Let me check your eyes out using some different lenses. Can you see the letters now?
	Okay, the last row. Umm, D, U, B….. Sorry… I can't **make out** the last letter clearly.
	Great! And the second row?
Yes! Now, I can make the letters out!	

What did you do?	
	The optometrist? Do I really need the glasses?
	I just kicked up the magnification. It looks like I'm going to have to get your optometrist to help you out with some glasses.
Well, you don't need the glasses when you're in the house. But I would urge you to have them you drive.	

Doctor: Good morning Poliana. How have you been?

Patient: Oh, I have been fine and you?

Doctor: Fine!

Okay, well, lets get started. Anything new or out of the ordinary you'd like to report?

Patient: No, nothing to report.

Doctor: Great. Have you been **keeping up with** the drops I gave you?

Patient: Yes, although I may need **a refill** of those drops

Doctor: I'll get the eye-drop prescription **filled out** after all consult.

Patient: Thanks Doctor! Could you also get the pharmacy to get me a ninety-day supply?

Doctor: Ninety days? Sure, I can do that.

Okay, lets run through the eye test. Cover your left eye. Can you read the letters on the board starting at the top and moving down to the bottom?
