Unit 3: Endangered Animals Worksheet 1

Name _____ Class _____ Group _____ Number _____

Date _____

Part A: : Math the words with the correct oictures.

fin	fangs	paw	trunk	antlers	wing	scales	claws	tusk	leg
neck	hoof	whiskers	beak	horns	shell	tail	feather	tongue	mane

1._____

2._____

3._____

4._____

5._____

6._____

7._____

8._____

9._____

10._____

11._____

12._____

13._____

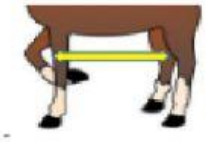
14._____

15._____

16._____

17._____

18._____



19._____

20._____

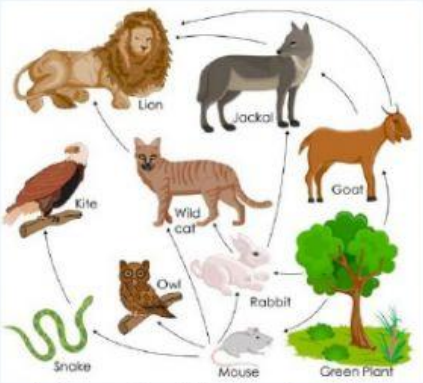
Part B: <u>Use the words in part A to write the sentences</u>.

1. People hunt _____ for their _____. (Picture 3)
2. People hunt _____ for their _____. (Picture 7)
3. People hunt _____ for their _____. (Picture 11)
4. People hunt _____ for their _____. (Picture 13)
5. People hunt _____ for their _____. (Picture 15)
6. People hunt _____ for their _____. (Picture 20)

LIVEWORKSHEETS

Part C: Read the passage and then answer the questions below.

Animals are a diverse and fascinating part of our world. They come in all shapes, sizes, and colors, have unique behaviors, and live in a variety of environments. One interesting fact about animals is that they often fill an important role in the food chain. As primary, secondary, or tertiary consumers, animals find food from other sources, such as plants or other animals.



Humans have been studying animal behavior for centuries. We use this knowledge to understand their habits and habitats better, as well as to help protect them when necessary. While many species of animals face extinction due to human activities like hunting, habitat destruction, or pollution, there are efforts being made to protect these species and even restore their populations.

Some animals have amazing adaptations that help them survive in their environment. For example, the Arctic fox has a thick coat of fur to keep it warm in cold climates, while the koala has highly developed fingerprints used for climbing trees. Other animals, like the chameleon, have color-changing abilities to blend into their surroundings and hide from predators.

Animals are an essential part of our world. While some species may be in danger or even extinct due to human activities, there is still much that can be done to help them survive and thrive. By understanding the important roles, they play in their environment and by respecting their habitats, we can ensure that these amazing creatures remain with us for years to come.

1. What adaptation does the Artic fox have to stay warm in cold climate?

   _____

2. What abilities does the chameleon have?

   _____

3. What human activities have led to some animals facing extinction?

   _____

4. How can we help animals survive and thrive?

   _____
