The story talks about symbiotic relationships. Symbiosis is a Greek word that means living together. It exists where 2 species form a relationship that benefits both of them such as having a pet dog. The dog gives love and companionship and its owner gives the dog food, a home and love in return. See if you can match the symbiotic pairs below. Then use the internet to research one of these pairs and how they help each other.

Bees	Algae
African Oxpeckers	Flowers
Ants	Fungi
Cleaner Fish	Hermit Crabs
Coral	Sharks
Goby Fish	Snapping Shrimp
Sea Anemones	Zebra

Where are the pair found?

What does each member of the pair get from the symbiotic relationship?

Draw a picture of the pair.
