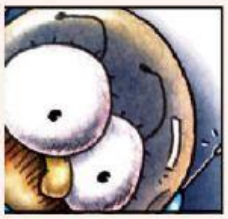
Fly Guy presents: Space

1) Solve these two puzzles by dragging and dropping the little images.



Puzzle 1

Insert images here.

Puzzle 2

Insert images here.

What's its name?

What's his name?

2) Complete these sentences according to what they learned about planets, moons and stars. Here you have a helping box. There is one extra answer.

small – orbit – planets – biggest – gravity

- There are eight _____ in the Solar System.
- Moons _____, or travel around, the planets. Earth has one moon.
- All objects orbit around the Sun because it has _____.
- Stars are huge balls of burning gas. Stars only look _____ because they are so far away.

3) True or false? (Write down "T" or "F".)

- Astronauts are people who travel into roller coasters. ☐
- Astronauts wear special clothes to keep them safe. ☐
- Astronauts can't live in space stations. ☐

4) Match the pictures and the descriptions of the objects.

Space suits keep astronauts safe, warm or cool and let them breathe.

A space shuttle uses rockets to blast off. It's a vehicle that travels in space.

Mars rovers are robots that explore Mars.

A telescope is a tool that uses lenses and mirrors to make faraway objects look nearer.
