8.6 Level 2 Math Problem of the Day

1. Which gas station has cheaper gas for our road trip?

2. My car gets 20 miles per gallon of gasoline. We are going on a 100 mile road trip. How many gallons of gas will I need to buy?

100 ÷ 20 = _____

5	**120**	**25**

3. We need 5 gallons of gasoline. If gas costs $2.00 a gallon, how much will gas for our road trip cost?

$2 + $2 + $2 + $2 + $2 = _____

or

$2 x 5 = _____

$15	**$7**	**$10**
