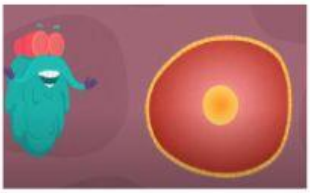
LET'S REVIEW CELL STRUCTURE!

1- Watch this video and complete: YES NO



- This is a cell. YES NO

- The cell is the BASIC unit of life. YES NO

- The CELL MEMBRANE is the outer part of the cell. YES NO

- MITOCHONDRIA make the PROTEINS of the cell. YES NO

- RIBOSOMES produce the ENERGY of the cell. YES NO

- The NUCLEOUS is the brain of the cell. YES NO

- CHROMOSOMES are IN the Nucleous.

YES NO

- CYTOPLASM is a jelly-like substance in the cell. YES NO

- LYSOSOMES clean the waste material.

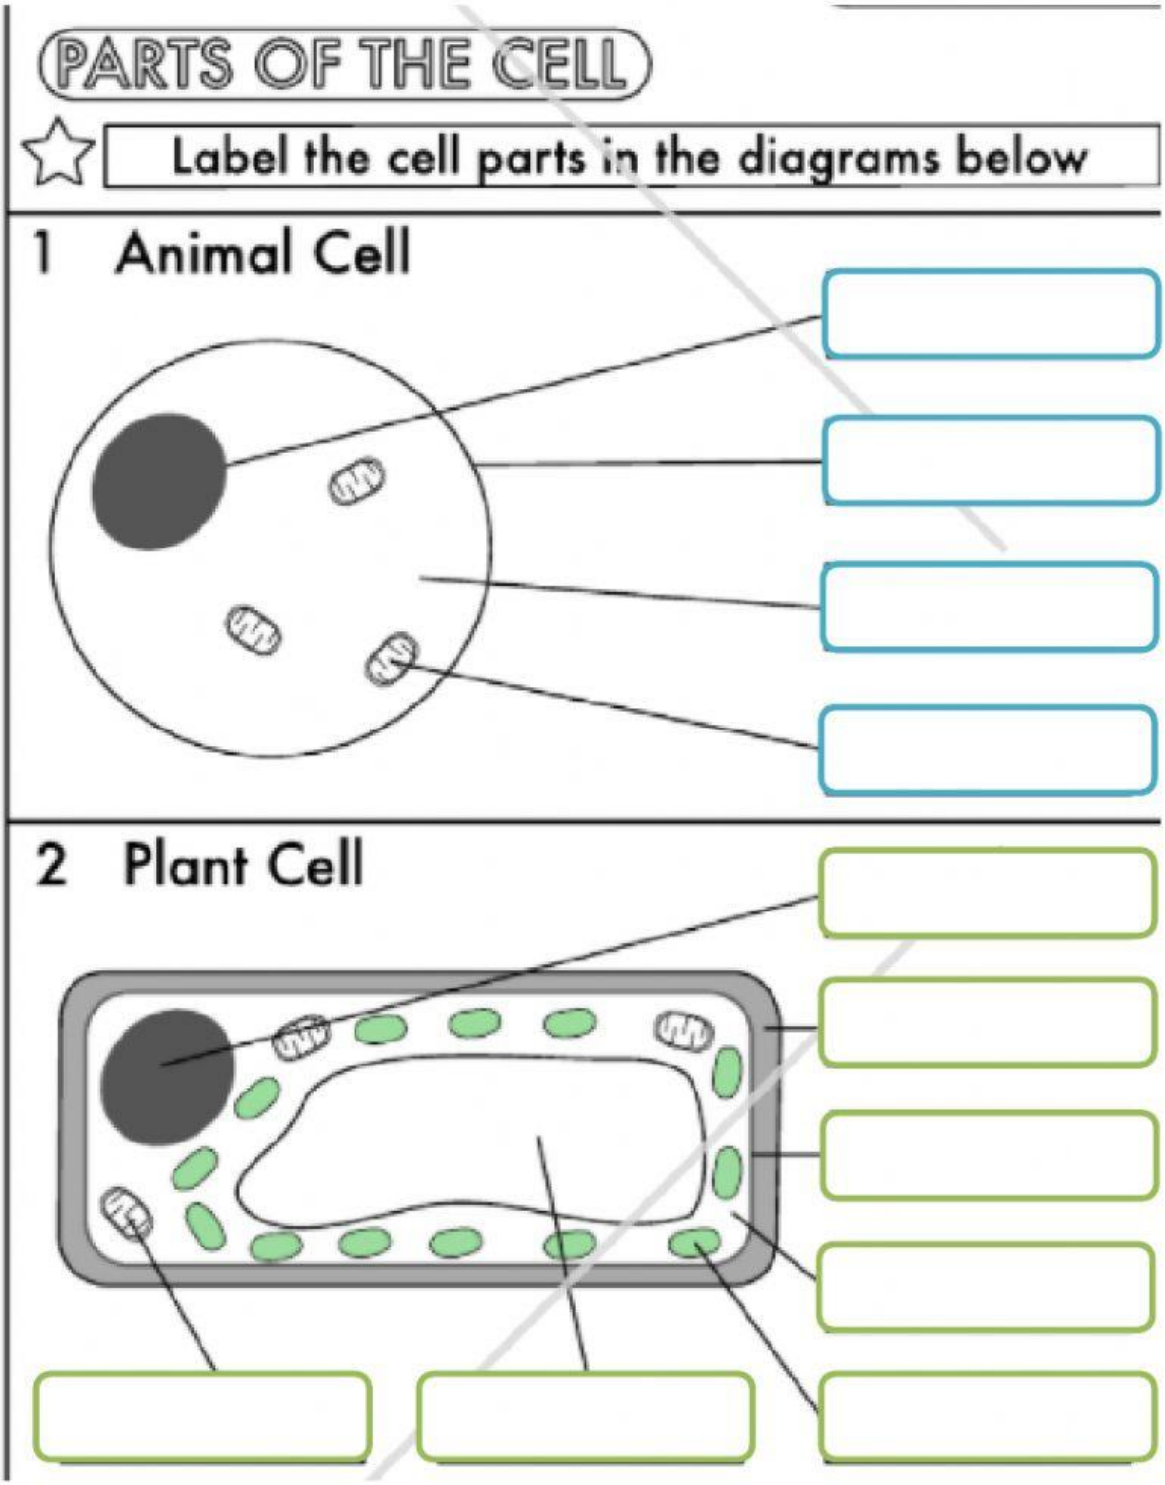
YES NO

2-MATCH THE CELL ORGANELLES TO THEIR FUNCTION

CELL MEMBRANE	Orders the cell what to do
NUCLEOUS	Gives shape to the cell. It is the outer part
DNA	Controls the cell and has the DNA
NUCLEOLOUS	Make PROTEINS
RIBOSOMES	Makes the RIBOSOMES
LYSOSOMES	Makes the ENERGY
MITICHONDRIA	Are the GARBAGE COLLECTORS

3- LABEL these CELL parts.

NUCLEOUS – CELL MEMBRANE – CYTOPLASM - MITOCHODRIA



NUCLEOUS – CELL MEMBRANE – CYTOPLASM – MITOCHODRIA – VACUOLE – CHLOROPLAST – CELL WALL
