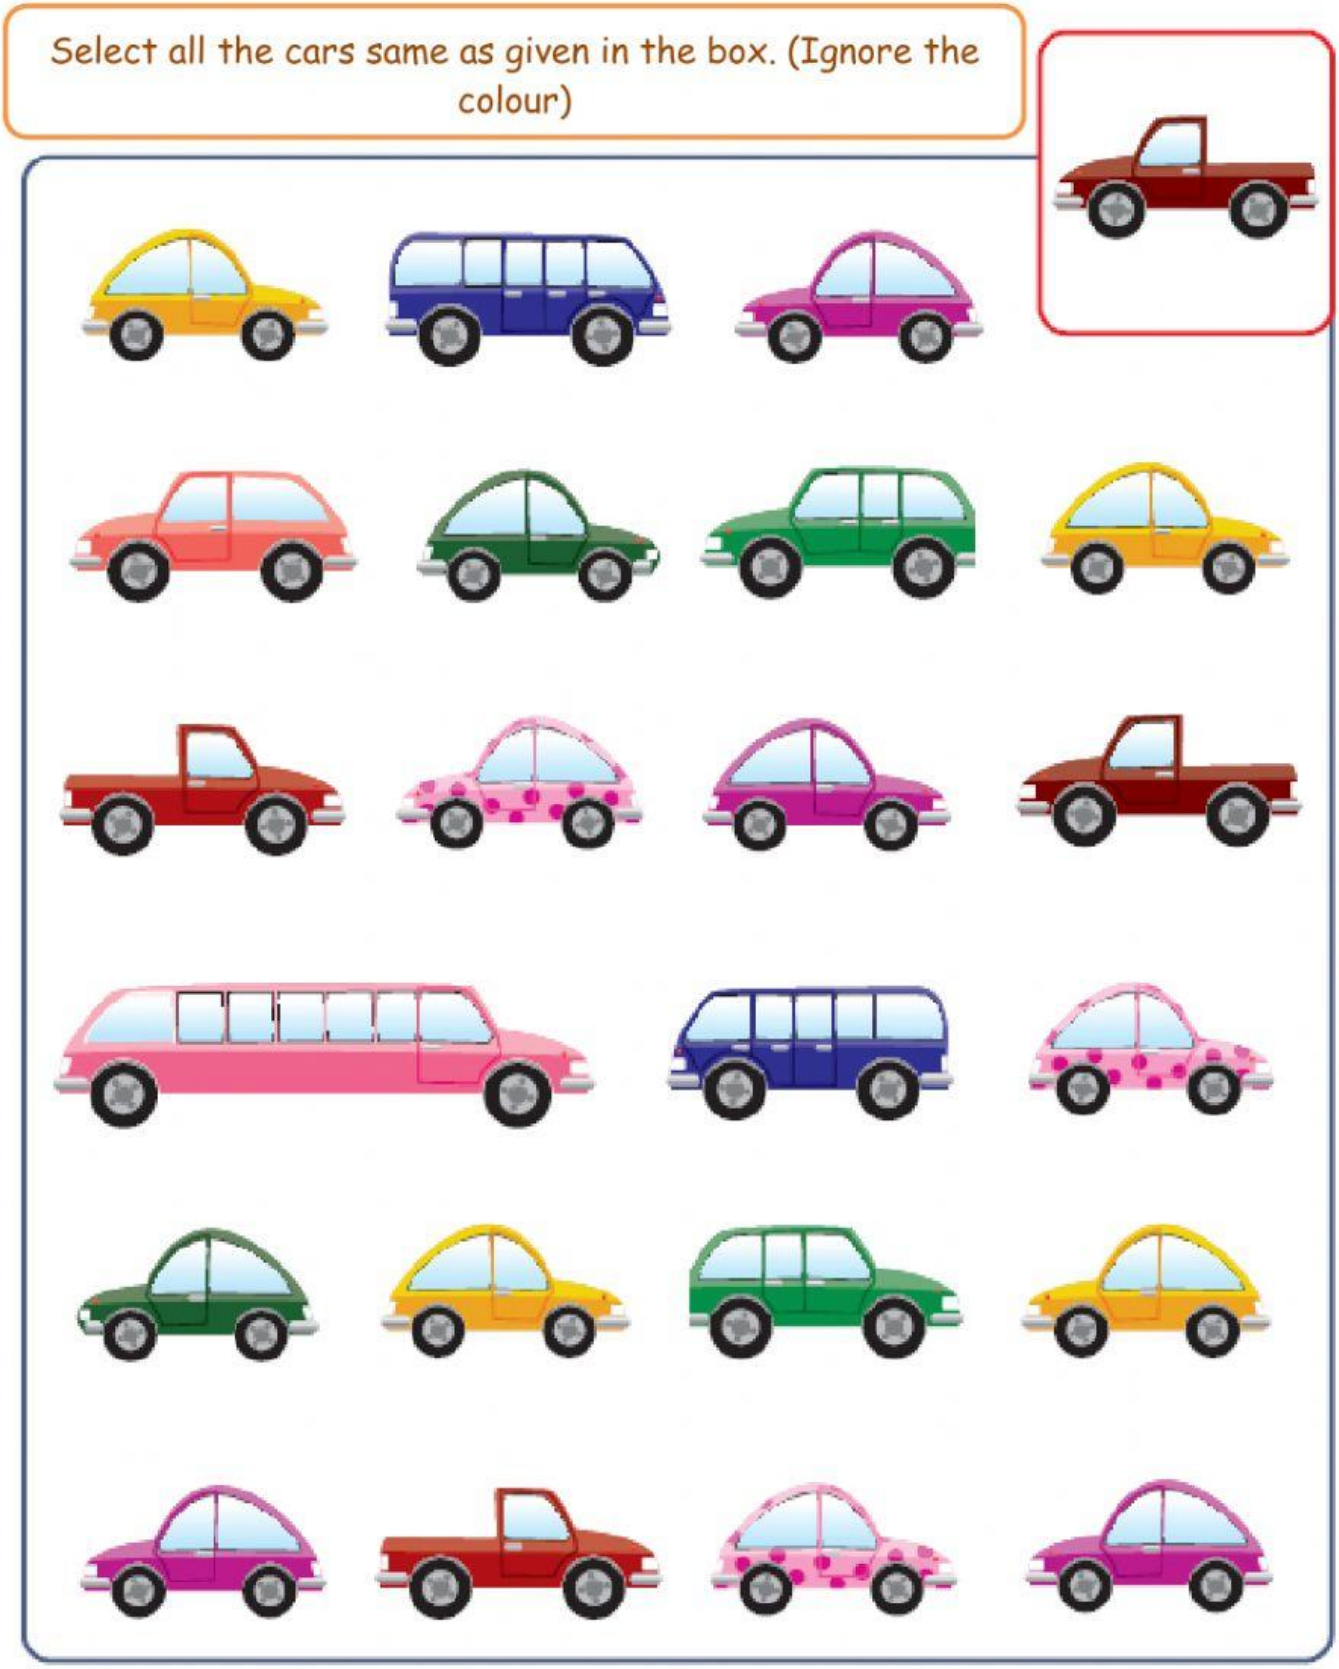
Perception/Visual Skills Development

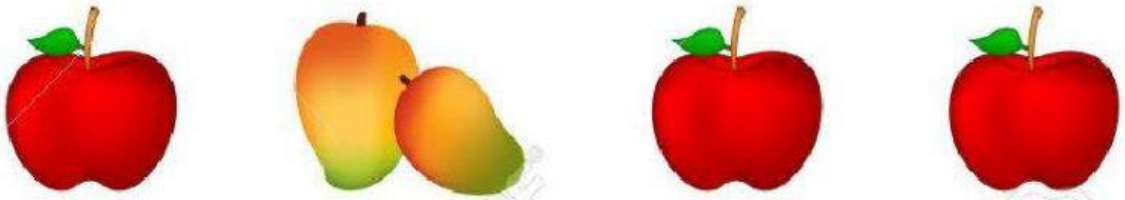
Visual Discrimination is the ability to differentiate one thing from another and its development is essential for child growth and development. To differentiate one thing from another we need to be able to see, identify and recognize details. Then analyse what details are similar and what details are different.

Select all the cars same as given in the box. (Ignore the colour)

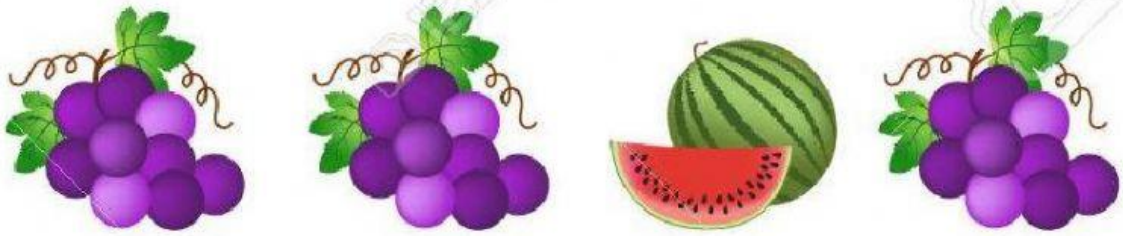


Circle the picture that is different from others in each row.

1.

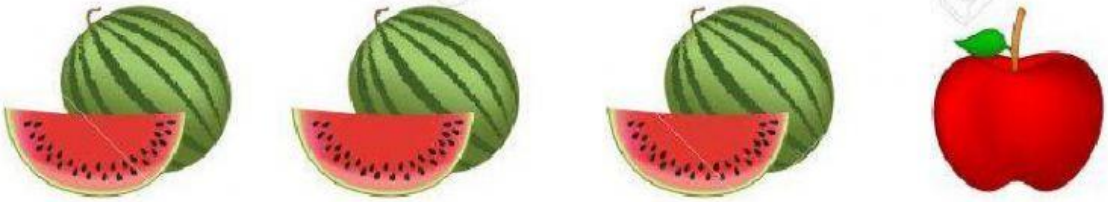


2.

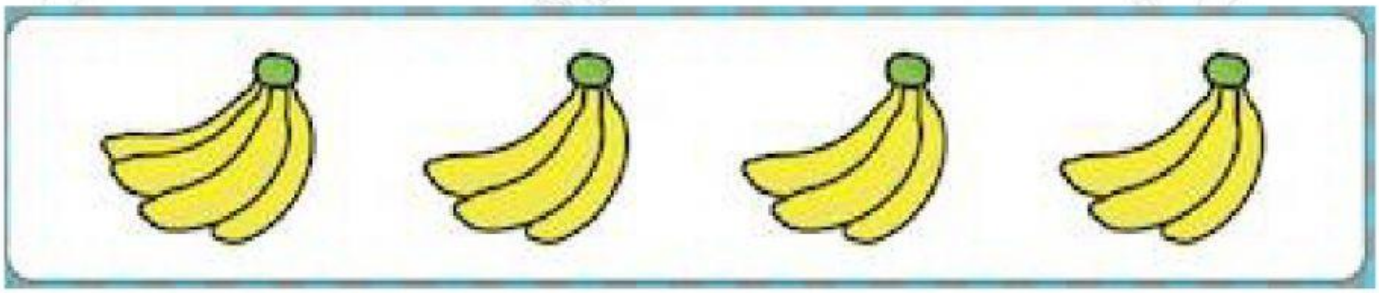


3.

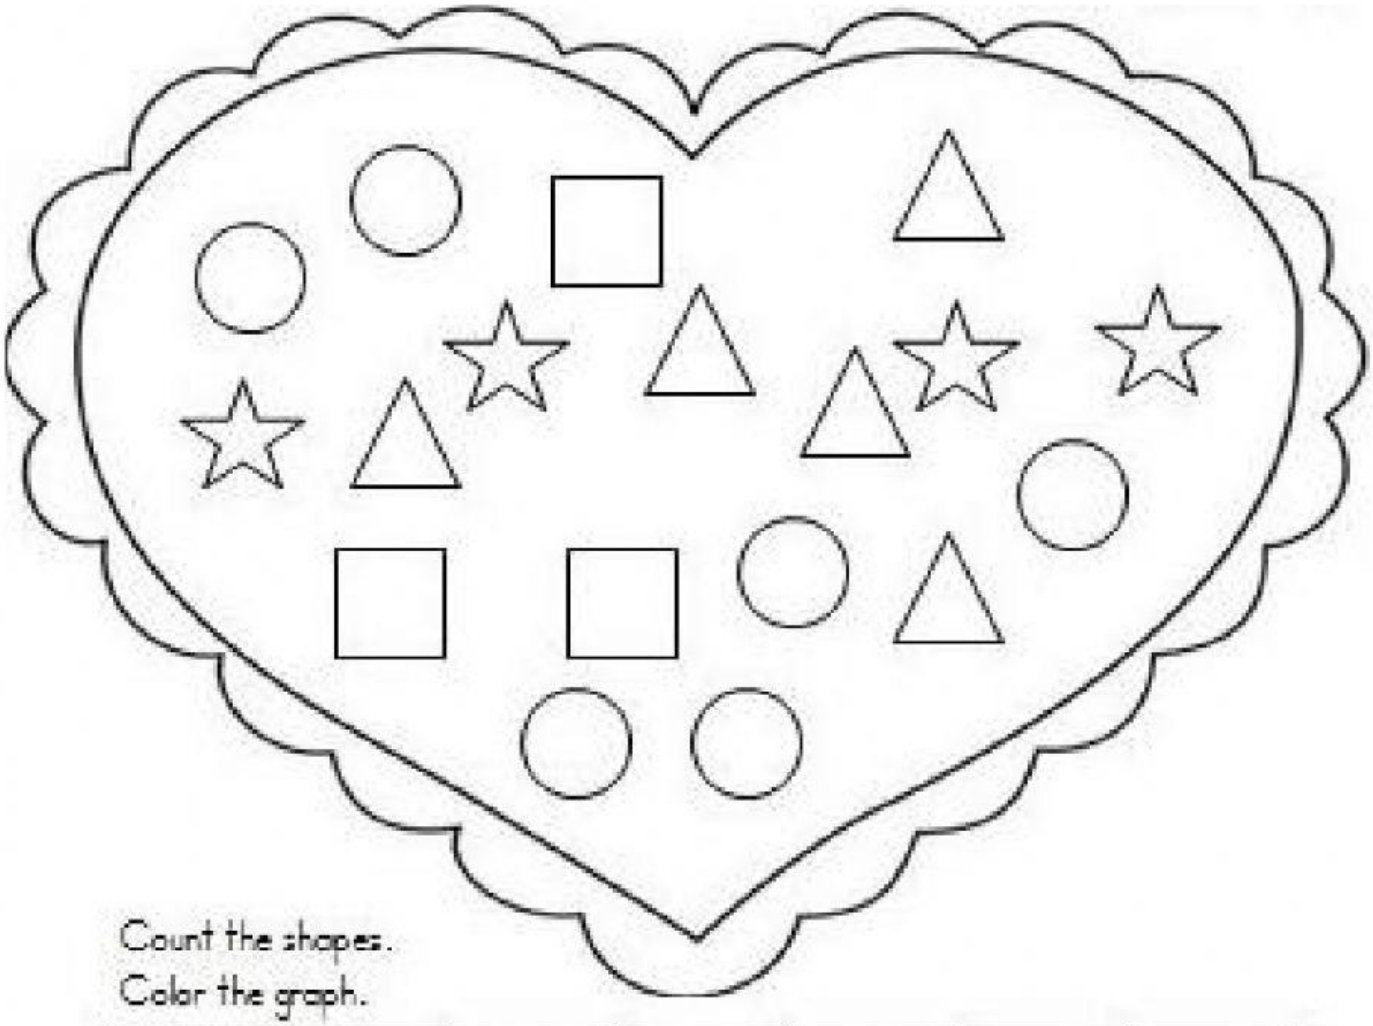
4.



5



Click and drag the shapes in the heart to the shapes in the given box.



Count the shapes.
Color the graph.
