TERRIBLE LIZARD

Read the information and then answer the questions.

I´m sure you have all read books about dinosaurs. They were the reptiles that lived over sixty million years ago. My favourite was the Tyrannosaurus Rex. The name means terrible lizard and we often say "T-Rex" to make it easier. If you have seen any dinasour movies like Jurassik Park or Jurassic World you know it was a terrible lizard! It had a huge mouth with big teeth, some as long as a banana, and very short arms. It liked to eat meat and it would catch and eat other dinosaurs. Dinosaurs died sixty-five million years ago, so now we can only see them in museums as bones that have turned into fossils. I am quite pleased about that, I don´t think I want to see a real dinosaur now!

How long ago did the dinosaurs die?

How many syllables are there in the word Tyrannosaurus?

How long could the teeth of this dinosaur be?

What is your favourite dinosaur?
