Ordering Numbers

ascend – to go upward

In the instance of ordering numbers: ascending order means from the smallest number to the largest number (least to greatest).

e.g. 13 46 78 89

descend - to move downward or to a lower position

To order numbers in descending order, begin with the largest number than move downward to the smallest number.

e.g. 92 65 51 29 6

Order each group of numbers in ascending order (from least to greatest).

13 23 32 63

21 82 11 6 19

Order each group of numbers in descending order (from greatest to least).

6 53 17 73

57 12 32 9 23
