Name:_____ Date:_____

6 Kingdoms of Life Test

Directions: Circle the correct answer

1. Which two kingdoms have no nucleus?

   a. protist and archaebacteria
   b. plant and animal
   c. eubacteria and archaebacteria
   d. fungi and protist

2. Which kingdom of life makes its own food through the process of photosynthesis?

   a. animals
   b. plants
   c. fungi
   d. protists

3. Which kingdom of life absorbs decaying and dead material?

   a. plant
   b. fungi
   c. eubacteria
   d. animal

4. Which kingdom do humans belong to?

   a. plant
   b. animal
   c. monkey
   d. archaebacteria

5. Which kingdom do mushrooms belong to?

   a. plant
   b. animal
   c. monkey
   d. archaebacteria

6. Which kingdom do roses belong to?

   a. plant
   b. animal
   c. monkey
   d. archaebacteria

7. What invention lead to the discovery of bacteria?

a. microscope
b. telescope
c. thermometer
d. hand sanitizer

8. How many kingdoms of life are there?

a. 2
b. 5
c. 112
d. 6

Directions: Place the kingdoms of life in order from simplest organisms to most complex

Animal	Fungi	Eubacteria
Protist	Archaebacteria	Plant

1._____

2._____

3._____

4._____

5._____

6._____
