New York is located on the East Coast. It has the biggest population in the country. It's exciting, famous for its sights, and very international, because about 30% of New Yorkers were born in other countries!

The city is made up of five parts called "boroughs": Queens, Brooklyn, Manhattan, Staten Island and The Bronx. They became one city in 1898.

There are many popular places we all know from films and TV. The most popular one is probably the Statue of Liberty, a tall, green monument celebrating freedom. Another is Central Park, a large area in the centre of the city where people can ride their bikes, jog, or have lunch on the grass. There are also many famous bridges over the East River, and Times Square, probably the busiest place in the city.

Many tourists visit New York every day. A lot of them say it's too loud, too dirty, and too expensive, but most of them love it anyway!
