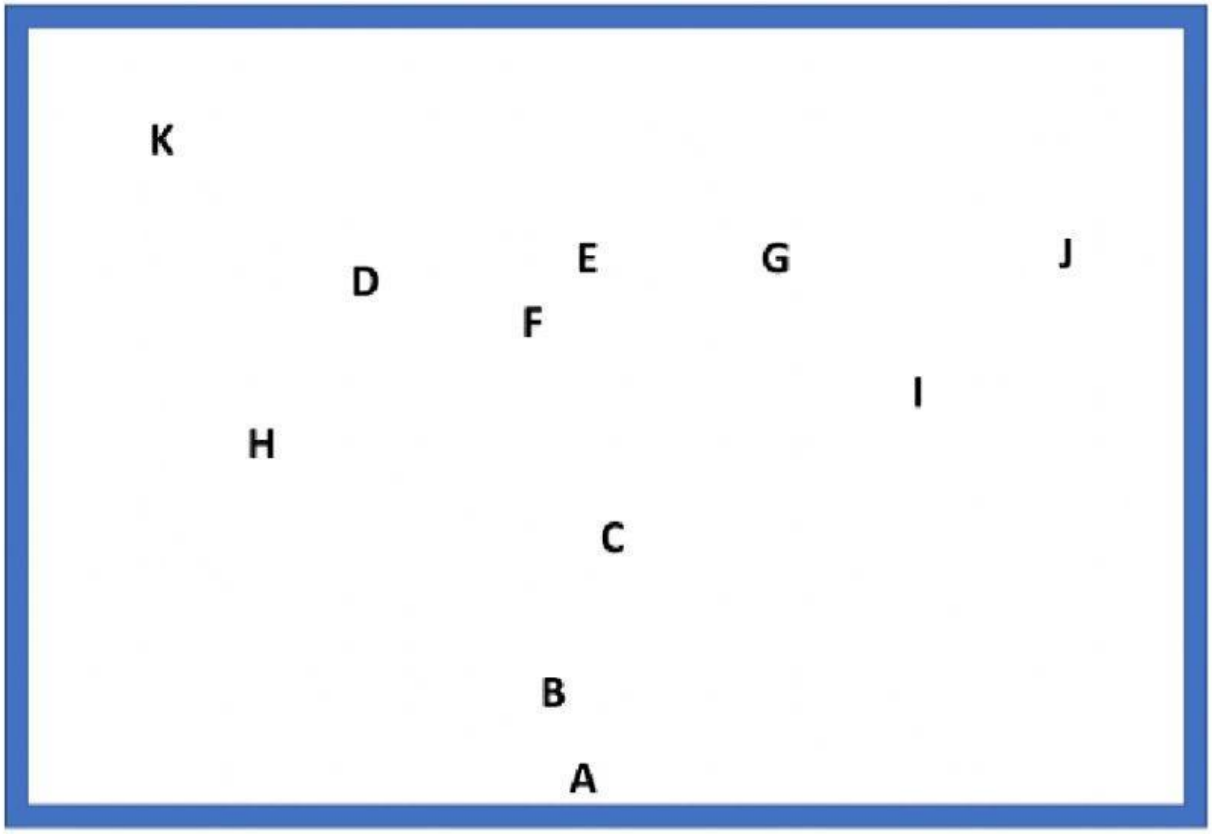
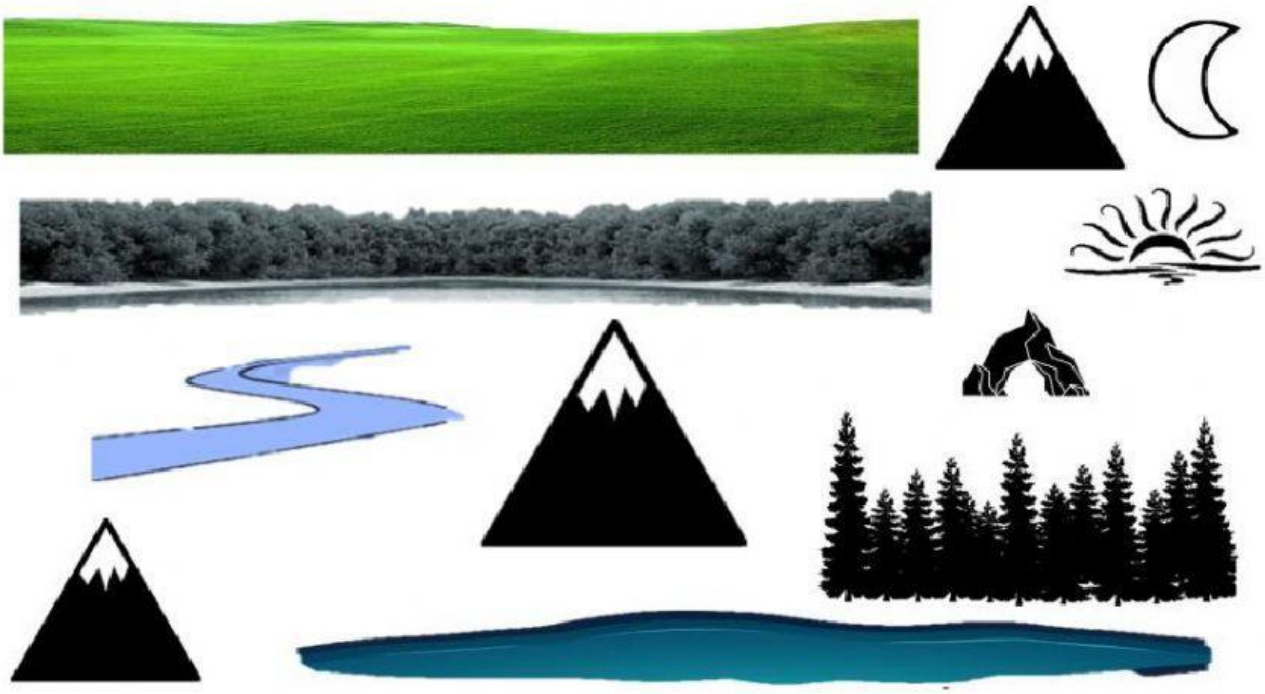
Read the passage and the place landscape items in the correct locations





I looked out the window and saw in front of me a big lake, surrounded by bushes and trees. Behind the bushes was a big meadow with plenty of green grass. In the distant background were three mountains. The biggest mountain was in the middle. It had a cave at the bottom left. The left mountain was smaller with the moon rising to the left of it. There was a river flowing out from between these two mountains. The third mountain was on the right of the big mountain and had a forest in front of it. The sun was setting behind this forest. It was a beautiful sight to see before bedtime.
