LIVEWORKSHEETS

[I] Water is one of the most essential resources on our planet, vital for all forms of life. However, increasing demand and pollution are putting immense pressure on our freshwater supplies. **[II]** According to recent studies, nearly 2 billion people worldwide live in countries experiencing **high water stress**, leading to a decline in the availability of this precious resource. This situation not only affects drinking water but also agriculture, sanitation, and energy production.

The primary causes of water scarcity include population growth, urbanization, and climate change. As cities expand, the demand for water increases significantly. Moreover, agricultural practices that rely heavily on water are becoming unsustainable in many regions. Climate change further **exacerbates** these issues, causing unpredictable weather patterns and extreme droughts, which reduce water availability.

[III] **In response to this growing crisis, everyone must prioritize water conservation**. Simple actions, such as fixing leaks, using water-efficient appliances, and practicing mindful consumption, can make a significant difference. Additionally, implementing policies that promote sustainable water management and investing in technologies for water recycling can help mitigate the impacts of water scarcity. **[IV]**

Despite these efforts, the challenges remain substantial. It is crucial that we recognize the importance of conserving water and take immediate steps to protect this vital resource for future generations.

33. Where in this passage does the following sentence best fit?
    These strategies can significantly improve water availability in stressed regions."
    A. **[I]** B. **[II]** C. **[III]** D. **[IV]**
