Linear Functions

Directions: Solve the equations by filling in your portion of the chart just like the first example with the numbers written here for the input and then multiply the 2 by the given number in the parenthesis and then add the number 9 to your answer for the output y.

Name	Input (x)	2x+9	Output (y)
Example	3	2(3)+9	15
John	18	2(x)+9	
Dan	24	2(x)+9	
Mike	33	2(x)+9	
Amy	19	2(x)+9	
Donny	35	2(x)+9	
Isabel	41	2(x)+9
