📄 Reading Worksheet: Mobile Devices

Grade: 12th – English for Web Development
Level: B1.1
Skill: Reading
Indicator: Explains the characteristics of mobile devices by answering questions and restating key elements.

📘 Part A: Reading Text

Mobile Devices: What You Should Know

Mobile devices like smartphones, tablets, and laptops are very common today. They are small, easy to carry, and useful for many tasks such as browsing the internet, sending emails, or creating content. These devices have special features that make them different from regular computers.

First, most mobile devices use **solid-state drives (SSDs)**. These are fast and quiet because they have no moving parts. They are also more resistant to damage if the device falls.

Second, many mobile devices have **touchscreens**. This means users can tap, swipe, and zoom with their fingers instead of using a mouse or keyboard.

Third, mobile devices often have **non-repairable components**. This means that if something breaks inside, it cannot be fixed easily. Users usually need to replace the whole device.

Finally, some older mobile devices may have **unusable hardware**. This happens when a part no longer works or when software updates are not available.

✏️ Part B: Vocabulary Match

Match the words to their meanings. Write the correct letter next to each word.

1. ___ Touchscreen
2. ___ Solid-state drive (SSD)
3. ___ Non-repairable
4. ___ Hardware
5. ___ Resistant

A. Cannot be fixed
B. Part of a computer (like the screen or hard drive)
C. You can touch the screen to use it
D. Can handle damage better
E. A fast storage device with no moving parts

✅ Part C: Multiple-Choice Questions

Choose the best answer. Circle **A**, **B**, or **C**.

1. Why are solid-state drives better for mobile devices?
   A. They are cheaper and slower
   B. They have moving parts
   C. They are faster and resist damage
2. What is one benefit of using a touchscreen?
   A. You don't need a mouse
   B. It makes the device heavier
   C. You must use a pen
3. What happens if a non-repairable part breaks?
   A. You can fix it at home
   B. You need to buy a new device
   C. You can replace the screen only
4. What does "unusable hardware" mean?
   A. The device is brand new
   B. The part works very well
   C. The part is broken or outdated
5. What is one reason mobile devices are popular?
   A. They are large and heavy
   B. They are easy to carry and use
   C. They have many wires

✍️ Part C: Write About Mobile Technology

Use the words from the vocabulary list below to write 5 complete sentences about mobile technology.

Try to show what you learned in the reading and <u>use at least one vocabulary word</u> in each sentence. You can use more than one word if you want.

🧠 Example:

"Smartphones use mobile applications to access social networks and play video games."

✏️ Now You Try:

1. _____
2. _____
3. _____
4. _____
5. _____
