We can keep Earth clean by following the rule of "**reduce, reuse, recycle**". **Reduce** means use less. We can reduce our use of resources like water or gasoline. Reuse means use again, rather than throw things away. We can reuse many things, such as jars, plastic bags, and boxes. Recycle means to make something new from something old. We can keep Earth clean by recycling materials such as aluminum, paper, and plastic. If we take these materials to a recycling center, they can be used again in a different way.

On Earth Day, we remind ourselves and everyone on Earth that we must do these things. We must do these things every day, not just on Earth Day. We must all do our part, and we can make a big difference. On April 22nd, remind everyone you know that every day is Earth Day!
