Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Yellowstone National Park was established in 1872. Located in northwestern Wyoming and extending into Montana and Idaho, the park is known for its spectacular geysers, hot springs, canyons, and fossil forests. Yellowstone was the world's first national park. Yellowstone National Park **encompasses** a large area of **unspoiled** wilderness that is almost entirely forested. The most common tree is the lodgepole pine, but other varieties of pine, as well as spruce, fir, and juniper are also found in Yellowstone.

The park is one of the largest wildlife sanctuaries in the United States. Among the more than 300 animal species found here are grizzly bears, elk, deer, antelope, moose, bighorn sheep, coyotes, and lynx. During summer, thousands of wapiti, or American elk graze in the park. More than 1,300 bison, which almost became extinct in the park, roam the eastern sections. Wolves, once thought to be a menace, were reintroduced to the park in 1995 after being hunted and trapped to the brink of extinction early in the 20th century. Nearly 300 species of birds, including bald eagles, osprey, white pelicans, California gulls, and Canada geese, either live in or visit the park. The rare trumpeter swan also frequents the area and is protected within the park.

Question 31: What is the main idea of the passage?

A. To discuss the dangers the flora of the park has to face.
B. To discuss the dangers the fauna of the park has to face
C. To show the bad condition of the park
D. To give information about the park

Question 32: What do wapiti do during summer?

A. They roam in the park
B. They visit the park
C. They graze in the park
D. They frequent the park
