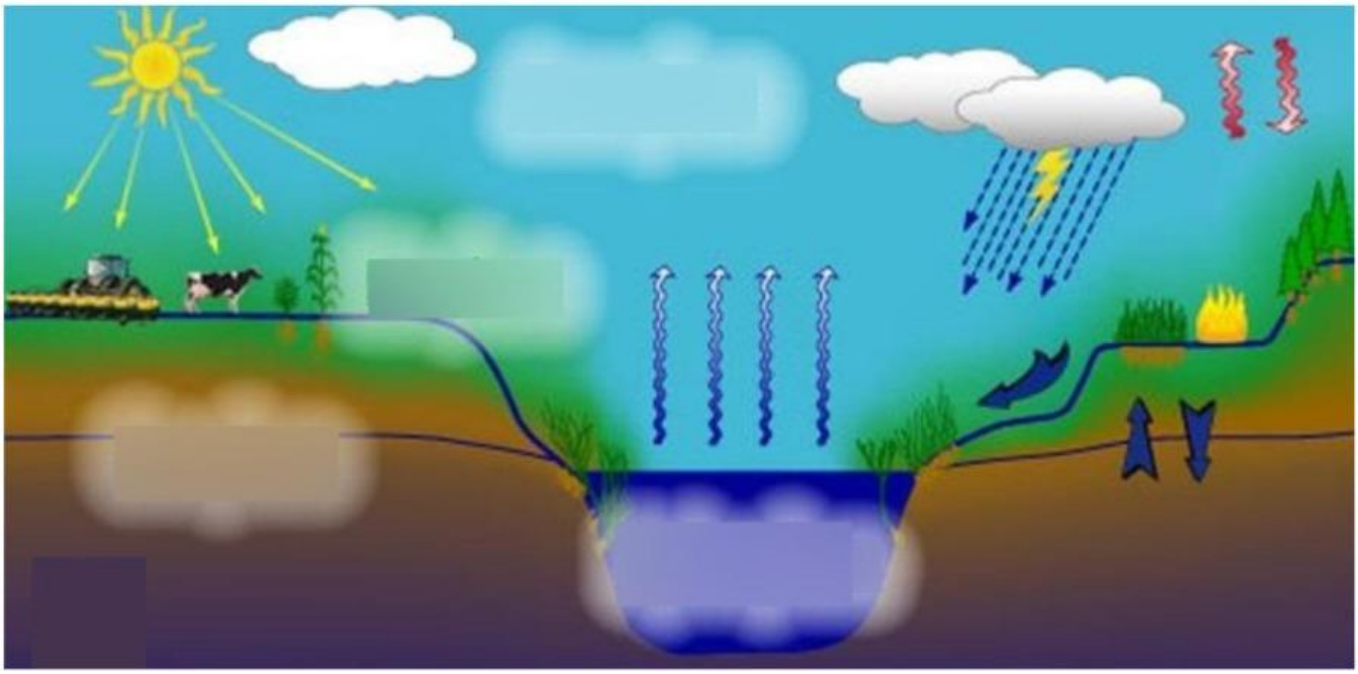
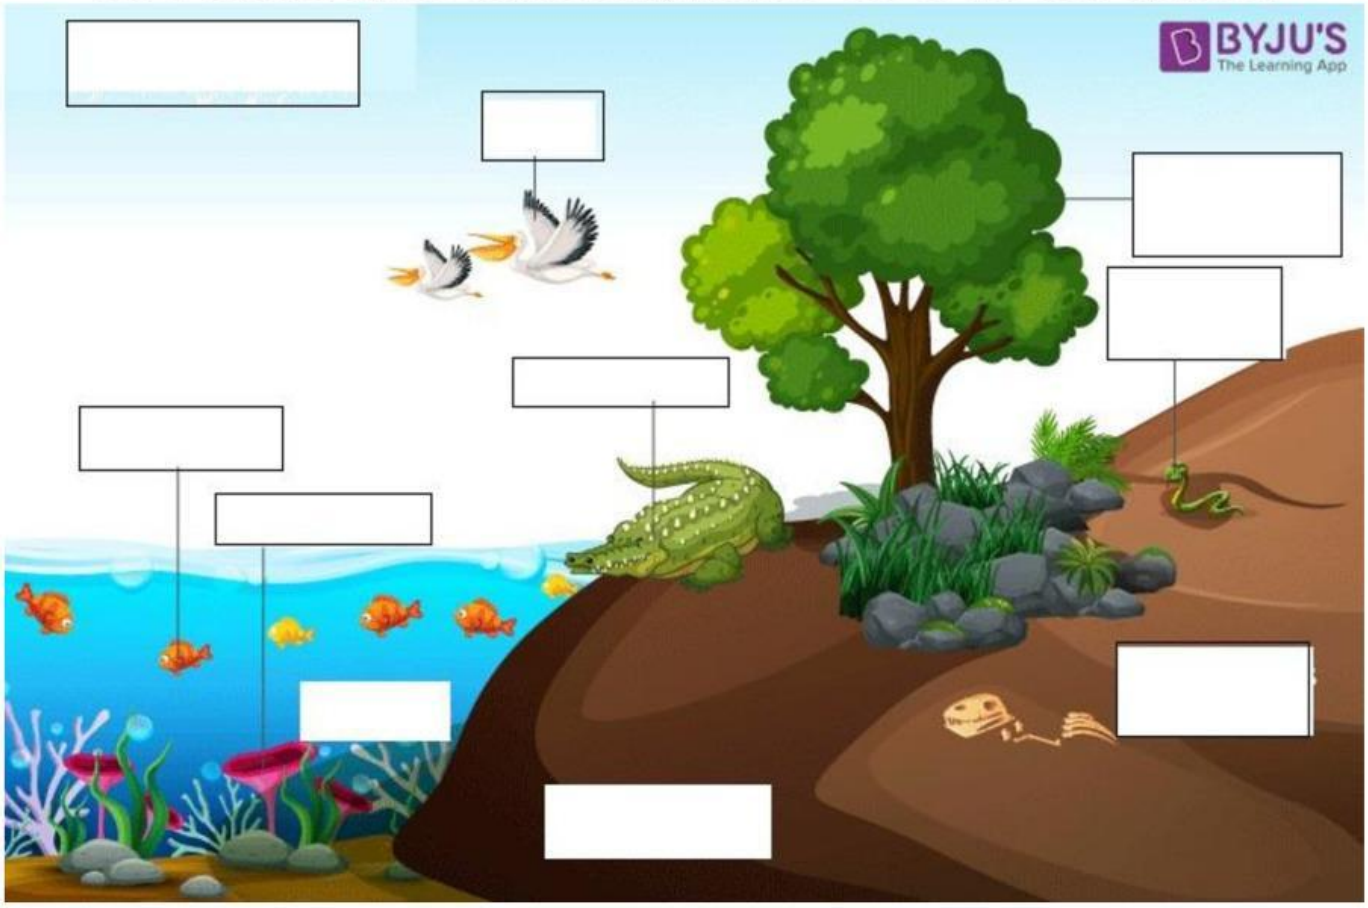
Unit 2: The Geology of the Earth (REVIEW)

What are the four spheres of the Earth?

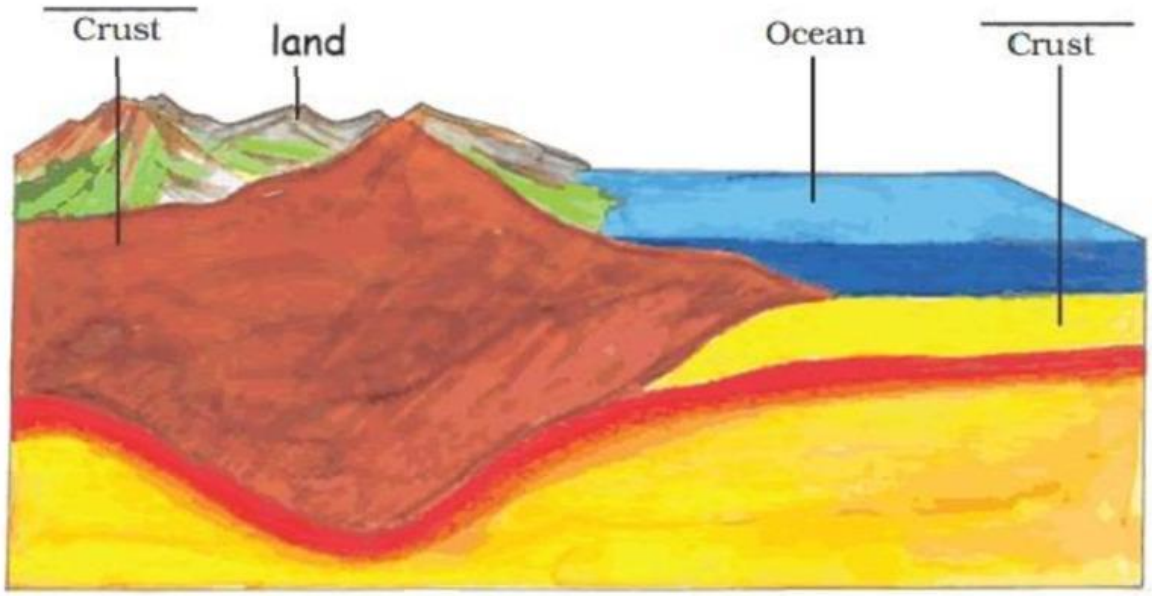


Label each of these connecting them to one of the four spheres.



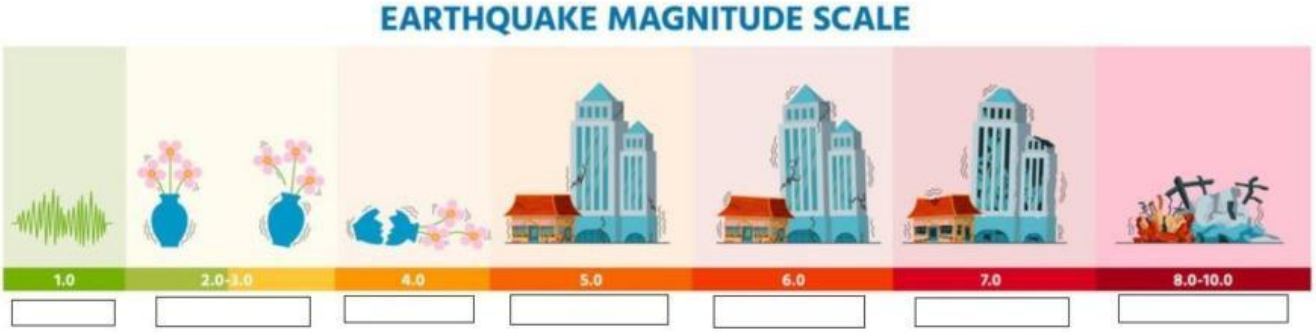
LIVEWORKSHEETS

What types of crust do we have on the Earth? (***Hint:*** *One is in water and the other is on land*).



What natural disasters have we been learning about in this unit?

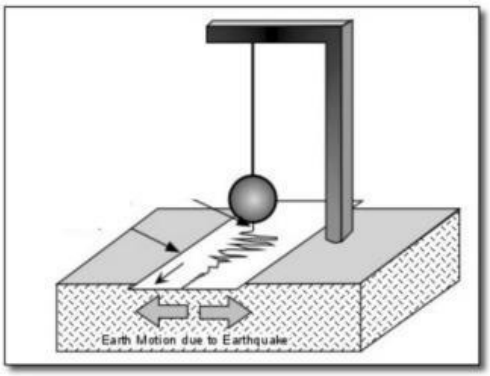
What is the name for each magnitude of Earthquakes:



LIVEWORKSHEETS

What type of rock do you think each of this corresponds to?

What is the name of the machine that measures the magnitude of an earthquake?

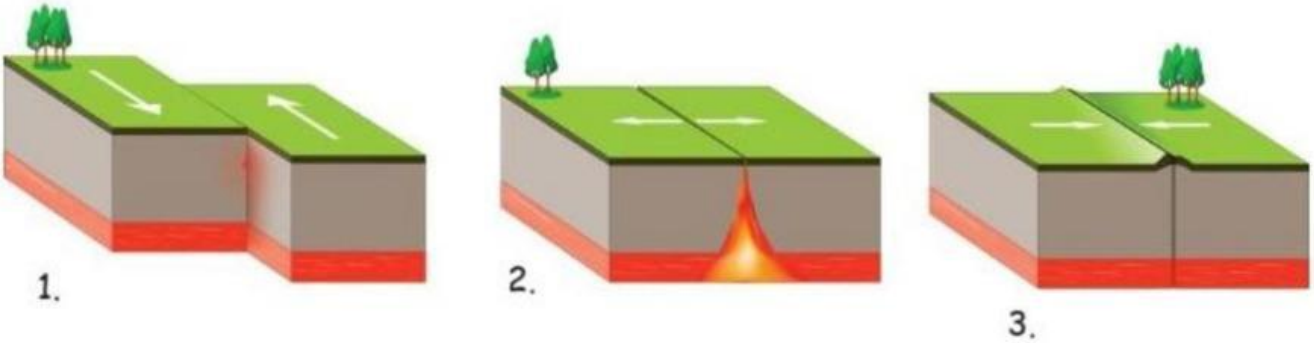


An earthquake happens because:

a) There is movement of tectonic plates
b) There is an explosion of a volcano
c) The mantle is too hot

LIVEWORKSHEETS

What three types of movement of tectonic plates can we have?



Label the parts of a volcano
