Name _____

# Find the Supporting Details

Read each paragraph.

Underline the topic sentence.

Write the main idea.

List two supporting details under the main idea.

Some seeds move on the wind. They have wing-like parts to catch the wind. Other seeds have hooks or stickers. They catch in the fur of animals and are carried to new places. Some seeds float on water to new places. People move seeds, too. They plant them in their yards and gardens. Seeds travel in many different ways.

**Main Idea:** _____

**Details:**

1. _____

2. _____

Electricity is created in power plants. There are three main types of power plants. A hydroelectric power plant uses rushing water to make electricity. A coal-fired power plant uses steam. So does a nuclear power plant.

**Main Idea:** _____

**Details:**

1. _____

2. _____
