4 Read. Write the correct word. (5 points)

What's the weather like today? It's raining! How does it rain?

Sun and water make rain. The sun is hot in the sky. It takes the water from the ocean, lakes, and rivers into the sky. The water makes clouds. Then the weather is cloudy. There are a lot of small raindrops in clouds. When there's a lot of water in a cloud, the raindrops get bigger and start falling from the cloud. They fall back down onto the mountains and onto the towns. That's rain! Look up at the sky. Is it raining now? Don't forget your umbrella!

1. There are two things that make _____—sun and water.
2. The sun takes _____ from the ocean.
3. There are _____ inside clouds.
4. If there's a _____ of water in a cloud, then it rains.
5. Don't forget your _____ when it rains.

5 Listen and check. TR: 21 (5 points)
